PROFILE

I am an aspiring IT professional with a keen interest in data analysis and is proficient in multiple programming languages, software development methodologies, and database management systems. With my academic background and autodidacticism, I bring a solid foundation in Information Technology with a focus on honing analytical skills in crafting impactful projects, showcasing my ability to leverage technology for data-driven solutions. I am eager to apply my knowledge to real-world scenarios and contribute effectively as a dedicated and analytical-minded Data Analyst.

SKILLS

HTML, CSS, MySQL, Power BI, Tableau Public, Python, PHP, Microsoft Office (Excel, PowerPoint, Word)

EDUCATION

Bachelor of Science in Information Technology Major in Web Development

Phinma Araullo University, 2019-2023

PROJECTS

Pageant Management System Internship Project | 2023

- This project aims to enable automatic computation of scores during competitions or events. The system will enable the judges to electronically enter their ratings, and the system will automatically tabulate the ratings and present the contest results.

Brgy. Camp Tinio Information System with Mobile App Services

Capstone Project | 2021-2022

- Our team collaborated in the development of an enhanced Information System with Mobile App Services for the Barangay Camp Tinio. This project aims to improve the information system of the barangay by creating a web-based and mobile system that will result to the reduction of processing time in the retrieval of barangay-related files, accessibility of residents' basic information and efficient generation of barangay clearances.
